PRECISION IS OUR WORLD...

OUR SERVICE IN DETAIL

Commissioning – Take-off!

LANG assures with the leaving of our production hall the highest possible quality and a short set up time in your company. After the set up our experienced service staff give a briefing in handling the machine for a save working, as well as application and maintenance instructions to ensure a long service life of the machine.

LANG Academy / Training Center – Perfect training to increase your efficiency and productivity

Optimize the setup and operation of your machine, software or LANG control system with the help of our individual and qualified training courses and training methods.

The experts of the LANG Training Center will take you step by step, with training tailored to your application, to make the most of the performance of your LANG products. Trainings can be held at our premises or directly at your site., of course online training is also possible.

Hotline- und Remote-Support – The hot wire for prompt assistance

Friendly and competent staff on our hotline can provide immediate telephone support in most cases after a detailed analysis of the problem.

Furthermore, malfunctions are localized via remote control and systematic assistance is initiated. Thus, not only downtimes can be minimized but also costs that would be incurred for service visits can be saved.

LANG Service Spare Parts – Service for process and planning safety

LANG spare part service ensures you a steady reliability and long lifecycle of your machine(s).

- ✓ high availability of spare parts
- ✓ fast and safe delivery (worldwide)
- ✓ fast an qualified consulting

Maintenance – Everything for an effective production

Equipment maintenance

A failure-free production process is a basic requirement for the economic success of your company. Regular care and maintenance by our technicians ensures consistent quality and preserves the value of your machine. In this way, your company gains a high degree of reliability while keeping costs predictable.

By concluding a maintenance contract, you ensure a forward-looking inspection, any potential weak points are identified in advance and failures are reliably prevented. If you are interested in further information please contact our service.

Spindle exchange service

We offer our customers a unique spindle exchange service that they cannot get anywhere else in the world. Call us immediately in the event of a crash or fault. Our staff will send you a new spindle package as quickly as possible to ensure your production reliability. Our machines are designed in such a way that the removal and reinstallation of the spindle can be carried out by the customer himself in the least amount of time and without special training.

Modernization – Keep up with the times!

As time goes the requirements for your machine are rising. That's why upgrades are necessary. Without problems this can be done for guarantee the efficiency of your LANG-machine.

Our standard conversion package for LANG milling machines:

- ✓ LNCexpress Upgrade for Impala 400 series
- ✓ LGT (MCG) ► LNCexpress Upgrade to a drilling machine

Software Updates – Always up to date!

LANG GmbH & Co. KG offers software updates for 1st CAD/CAM software versions in regular periods. Regular updates of our CAD / CAM software always ensure a reliable production process and maintaining a proper data creation.
